Summary/ Objective

With over 5 years of experience in business analysis and intelligence, I am deft at juggling multiple work items and understanding complex business processes. Notably, I led a business critical reporting project at The Capital Group Ltd that improved project time-line outcomes. My strengths lie in my proficiency in SQL, analytical approach and experience in managing conflicting business needs.

Education

Qualification	University	Year of Completion
PhD in Data Science and Analytics	Kennesaw State University Georgia, United States	2021
Masters in Data Science and Analytics	College of Charleston South Carolina, United States	2015
Bachelors in Business Analytics	Syracuse University New York, United States	2009

Relevant Coursework: Database Management, Data Analysis, Statistics, Business Intelligence.

Working Experience

Business Analyst
The Capital Group Ltd, Accra
2018 - 2021

Supported the implementation of business intelligence solutions and improvement.

- Communicated and documented the IT impact for diverse operational projects, ensuring all changes are accurately communicated and understood.
- Managed and prioritised various work items effectively, ensuring project deadlines are met.
- Increased productivity by 25% by aligning conflicting needs and prioritising key projects.

Data Analyst
Earthworm Foundation, Accra
2015 - 2018

- Participated in creation, implementation, review, and improvement of internal data processes, including data structure, handling, quality controls.
- Participated in creation of data solutions for new commodities, products, or services (internal and external)
- Designed and implemented different dashboards to better visualize the data and guide actions

Accomplishments

- I developed a predictive analytics model to forecast future sales, resulting in the improvement of sales forecast accuracy by 25% and enabled proactive inventory management, which also resulted in a 10% reduction in stockouts at The Capital Group Ltd.

- Streamlined data extraction and reporting processes, reducing report generation time by 50% and enabling real-time data access for decision-makers at The Capital Group Ltd.
- Designed and implemented interactive dashboards and reports that provided actionable insights to stakeholders, resulting in a 25% improvement in decision-making processes and a 20% increase in data accessibility.

Technical Skills

- Proficient in Python, JavaScript, Java.
- Familiar in Git, PyCharm, Docker, VirtualBox.
- Experienced in Power BI, Tableau, QlikView
- Accomplished in MySQL, PostgreSQL, Oracle Database, Neo4j.
- Expert in operating systems such as Windows, Linux, macOS, Unix.

Soft Skills

- Good Communication skills
- Great Problem-solving skills
- Critical Thinker
- Ethical Conduct

Projects

- **Sales Forecasting Model**

Description: Developed a predictive model to forecast future sales based on historical sales data, market trends, and external factors.

Technologies used: R for statistical analysis, Excel for data processing, Power BI for data visualization.

Outcome: Improved sales forecast accuracy by 25% and enabled proactive inventory management, resulting in a 10% reduction in stockouts.

- **Operational Efficiency Dashboard**

Description: Designed and implemented an interactive dashboard to monitor Key Performance Indicators (KPIs) and track operational efficiency metrics in real-time.

Technologies used: SQL, Power BI for data visualization.

Outcome: Increased visibility into operational metrics, leading to a 30% reduction in production downtime and a 20% improvement in resource utilization.

Professional Development/Training

Workshops Attended

- **Advanced SQL Workshop**

Description: A deep dive into advanced SQL techniques for data analysis and manipulation. Covered topics include window functions, Common Table Expressions (CTEs), advanced joins and subqueries, and performance optimization strategies.

Duration: 1 day

Provider: SQL Mastery Institute

Key Learnings: Mastery of Advanced SQL concepts and techniques, ability to write complex queries for data analysis and reporting, and optimization skills for improving query performance.

- **Power BI Essentials**

Description: An introductory workshop on Microsoft Power BI, covering data preparation, visualization creation, and dashboard development. Hands-on exercises include connecting to data source, creating interactive reports, and designing dynamic dashboards.

Duration: 2 days

Provider: Power BI Training Hub

Key Learnings: Proficiency in using Power BI for data analysis and visualization, ability to create interactive reports

and dashboards, and understanding of best practices for data storytelling.

Certifications

- **Microsoft Certified: Data Analyst Associate**
Provider: Microsoft Learn
- **Udacity: Business Analytics Nanodegree**
Provider: Udacity

Professional Conferences Attended

- **Microsoft Ignite**
Provider: Gartner
